

Our SuperSpanders will help you hold down waste!

Superior Performance!

Engineered for durability. Your savings will be compounded for years, making this one of the shrewdest investments you'll ever make.

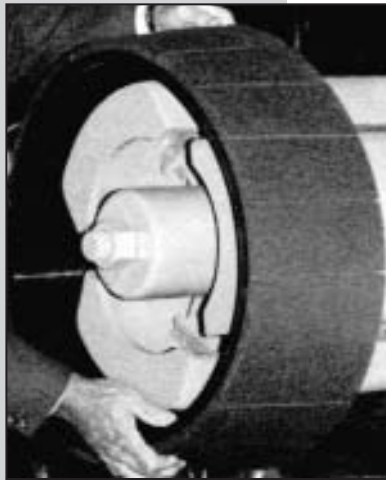

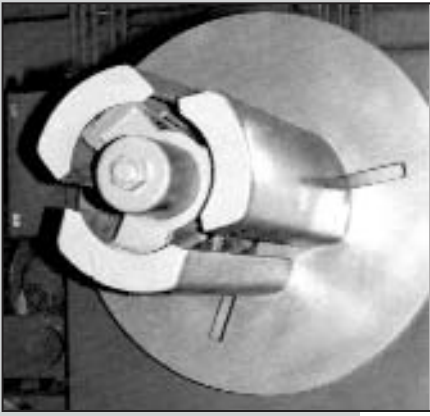

Formulated for durability, our compounds are made from the highest quality proprietary elastomers. Superior design and care in manufacturing make our SuperSpanders the best on the market.

It's Like Money in the Bank...

Eliminate coil end scrap. The Menges' SuperSpander is much more than just filler rings. By buffering the harsh contact between a coil mandrel and coiled steel, Menges' SuperSpanders virtually eliminate coil end scrap. The results are higher yields per coil – or money in your bank.

Coil Processors find that Menges' SuperSpander boost profits and productivity.

Some customers of Menges Roller Co. SuperSpanders boast of recovering their initial costs in the first 30 days of use!

As a major manufacturer of quality roller products, and because of our constant striving for longer wearing and more reliable roller products, you can choose a Menges SuperSpander with confidence. With years of potential use, you'll recover your initial investment over and over again.

Also, our SuperSpanders offer . . .

- . . . oil and abrasion resistance makes it an outstanding product in all types of metal service centers.
- . . . superior elongation and compression set resistance, for those rigorous mandrel activities.
- . . . easy installation and one-man handling that eliminates downtime on the shop floor.
- . . . a vast selection of sizes and configurations that are engineered to fit all mandrel and coil applications.
- . . . extends the capabilities of your winder or unwinder to utilize larger inside diameter coils.

System Components for Complete Handling Efficiency

- uncoiler expanders
- recoiler expanders
(with or without gripper bars)
- tension stand rolls
(grooved or knife cut)
- pinch rolls
- coil hold-down rolls
- coil cart rolls
- rubber covered guiderolls
